**We Are A Leading Custom Sportswear
Manufacturer And Exporter.**

TRENDY FASHION TECH

Trendy Fashion Tech is a reputable, international supplier of high quality Streetwear, Sportswear, Fitness clothing and Sporting Goods. Shop a brilliant range of Casual Wear clothing for men and women, for a whole range of fitness requirements. Nerian Sports prides themselves on offering urban clothing that is not just stylish and trendy, but also comfortable, durable, supportive and just generally perfect for your workout sessions. These brands are well known for their high quality materials and innovative design and this is echoed in the vast number of positive reviews regularly received, from happy customers.

Trendy Fashion Tech are fashion clothing providers who believe fashion out should be fun and invigorating, and they understand it is something which you are passionate about. They recognize that many of their customers carry this passion into the buying of their fashion clothes and because of this, they always ensure that requirements are met with nothing short of excellence in all of the supplied clothing.

PRODUCTION VIEW

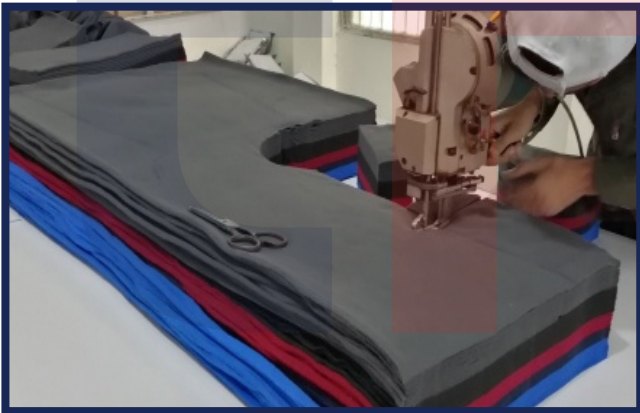

Raw Material

Our raw materials are meticulously sourced from the finest suppliers worldwide. Each element is chosen for its unparalleled quality, ensuring the foundation of excellence in every product we manufacture.

Pattern Cutting

Delve into the meticulous world of pattern cutting, where each line is a masterpiece of precision. Our artisans weave expertise and creativity, crafting patterns that are not just templates but narratives of style.

Fabric Cutting

In our Fabric Cutting Section, we pride ourselves on the meticulous selection of raw materials sourced from premier suppliers worldwide. Each element is chosen for its unparalleled quality, forming the basis for excellence in every product we craft.

Stitching

In our Stitching Hall, the art of precision takes center stage. We commence our craftsmanship journey by acquiring premium raw materials from esteemed global suppliers, meticulously chosen for their unparalleled quality.

PRODUCTION VIEW

Ready to Pack

In our Ready-to-Pack Area, efficiency meets quality as we prepare our meticulously crafted products for their journey to your hands. Each item, crafted with precision and care, undergoes a final stage of inspection and careful packaging in this dedicated space

Ready to Ship

At Mi Apparels, our commitment to delivering excellence extends to our Ready-to-Ship department. As we prepare to dispatch our meticulously crafted apparel, quality assurance takes the forefront in our dedicated Ready-to-Ship area.

Screen Printing

Screen printing is known for producing vibrant, durable prints that can withstand repeated washing and wear, and is a popular choice for printing on textiles and other materials.

Chenille Embroidery

Embroidery is the process in which an image or design is stitched onto fabric. Using various types of threads, any image, word, or shape can be embroidered onto any material.

PRODUCTION VIEW

Sublimation

In our Sublimation Section, innovation and artistry converge to create vibrant and lasting impressions. We begin by carefully selecting top-tier raw materials from renowned global suppliers, each chosen for its exceptional quality.

Embroidery

Our raw materials are meticulously sourced from the finest suppliers worldwide. Each element is chosen for its unparalleled quality, ensuring the foundation of excellence in every product we manufacture.

DTF

DTF prints can last without any significant fading anywhere between 2 to 5 years. Yet, the longevity of every print is influenced by a variety of factors. While the durability of DTF transfers is impressive, it's essential to recognize that certain variables can impact their lifespan.

DTG

Direct-to-garment printing is a method of producing t-shirts that uses a special digital printer to apply water-based inks directly to fabric surfaces. It differs from other printing methods because it transfers inks directly to t-shirt surfaces without using a screen or paper as an intermediary.

No. Of Stitching Lines

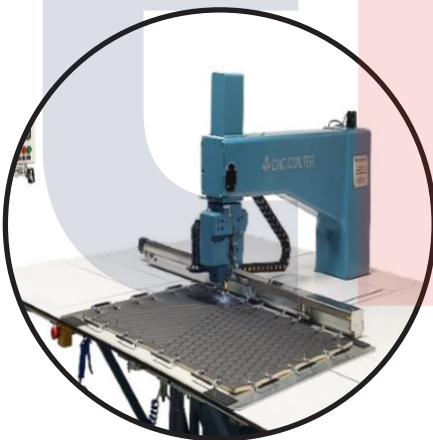

Our Stitching section is categorized domain wise as below,

- ❑ Textile - 03
- ❑ Hoodie & Denim - 02
- ❑ Knitwear – 02
- ❑ Accessories – 01

Total = 08 -Lines

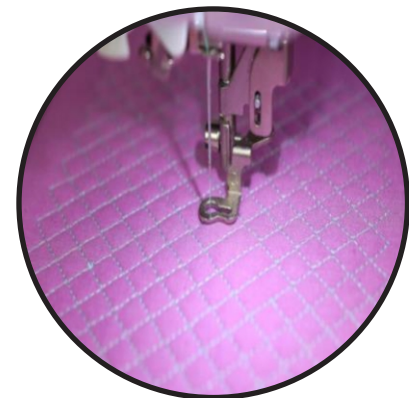

Each line is equipped with 25 to 30 latest auto Machines depending upon the article's Operation breakdown & required Target.

A production line involved different types of sewing machines, non sewing equipment, and workstations for manual processes. Each workstation is designed for a specific article's operations.

Type of Stitching Machines

- Single Needle Machines
- JUKI 1181 Walking Foot Machine
- Double Needle Machines
- Bartack Machines
- Flat Lock Machines
- Chain Stitch Machines
- Overlock Machines
- Binding Machines
- Quilting Machines
- Multi Needle Machines
- Eyelet Button hole Machine
- Sewing Pattern Machines
- Waist Belt Machine
- Button Press Machine
- Edge Cutter Machine
- Heat Fusing Machines
- Feed Roll Machine
- UNION Special Machine
- Feed of arm Machine
- Loop Make Machines
- Velcro Cutting Machines
- Zig Zag Machine

Stitching Department

Our stitching facilities are equipped with the latest high-tech machinery to maintain top quality. We have the best skill set of sewing operators aided by state of the art machinery producing almost **1300 PCS** per day ensuring all quality & customer requirements are met. After receiving the garments components from cutting section, all the garments parts are joined and sewn sequentially. Obviously all the components are sewn in respect of customer's requirement.

TFT Stitching Department is sector wise categorized with latest auto machines in all domains. TFT Production goal is to deliver the Goods in right Quality, economical cost & within the committed LT by fully optimizing the production capacity.

TFT has fully skilled & Technical staff in all sectors, that all are playing their role in Garments Manufacturing & in overall development of the factory.

Quality Control Processes

TFT has strong internal QC & QA Teams to make sure the product quality. Below steps has been in practice to make sure the quality standards in stitching department.

- ☐ PP meeting for every style before starting the production
- ☐ Perform in-line, Mid Table & end-of-line inspection at stitching floor.
- ☐ Checking the complete operations necessary for passing a every style.
- ☐ Keeping a measured Garment during the inline & offline checking.
- ☐ Check all the bundles in this manner that 100% of every bundle must be checked
- ☐ Random Auditing of garments in the Sewing Section by QA Team
- ☐ Keeping all documents and data of inspection. Maintaining all records properly.
- ☐ Monitor the quality of the product through the various stages of production.

Process Overview

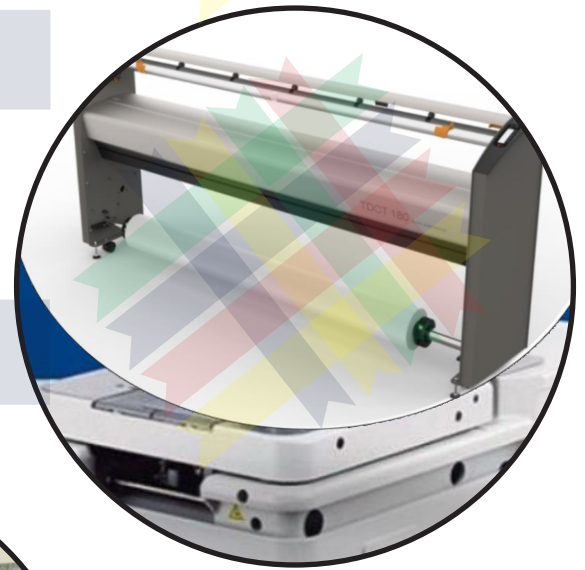

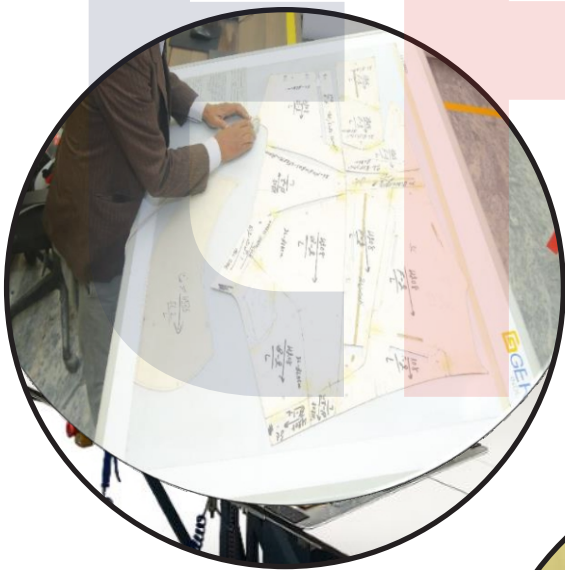

GGT PLOTTER

For Pattern & Marker Making we use Gerber Garment Technology (GGT) V13 with the plotter latest model **TDOT-220 ULTRA WIDE** having 4-Head CUT & GO features.

Before Cutting Marker is plotted in System @ planned fabric width, after lay spreading, marker paper is placed at the fabric cake to cut as per the article's approved patterns in GGT with accurate & precise requirements of Cut Panels

GGT PATTERN DIGITIZER

For Pattern Digitizing & specs precision we use GGT Pattern Digitizer.

Quality Control Equipment's

Quality Control Equipment's:

Currently we're using the below equipments as to make sure the quality standards

- ☐ Micro Meter Screw Guage
- ☐ GSM Scale & Cutter
- ☐ Shade Matching Lightning Box.

Future Plans:

We're working to develop the more precise mechanism for incoming fabric inspections i.e. the incoming fabric will be inspected by the following method,

4 POINT Fabric Inspection System

Also, a machine is under consideration to be arranged for fabric inspection, in order to minimize the quality risks in main components & to deliver the goods with best quality standards
